

Feather-weight apparel for  
heavy duty protection

**LUMAX**  
Protective Apparel

## COAT APRON

Lumax Coat Aprons are designed for maximum comfort, minimum fatigue and complete freedom of movement. Padded shoulders and waist velcro closure enable even distribution of apron weight.

## DESIGNER APRON

The designer range consists of sporty designs that add a touch of colour to the otherwise solemn ambience of an x-ray room.

Europa

Varelli

Scala

## DOUBLE SIDED APRON

Double sided aprons provide complete protection to the whole body. These are especially useful in cathlabs and similar operational areas where the risk from radiation is higher. And therefore, protection offered is complete.

## SKIRT AND VEST

The skirt and vest as a set allow more freedom of movement vis-a-vis other protective apparel. The vest is provided with all the features present in a coat apron with velcro fastening in front. At the same time, the skirt is conveniently styled and overlaps in front to ensure double protection of critical areas.

## THYROID SHIELD

Covering up to the chin, the thyroid shield is specially designed to protect the thyroid area. Its velcro closure makes it suitable to any neck size.

## PROTECTIVE GLOVES

Made with seamless moulding, these flexible gloves are covered with high quality detachable covering for easy cleaning and inspection.

## X-RAY GOGGLES

These provide excellent protection against scattered radiation and can be worn directly. Available with both front protection and front and side protection.

## OTHER PRODUCTS

### MINI APRON

Half apron for patient protection or easy use of operator.

### GONAD SHIELD

Protection of male genital area.

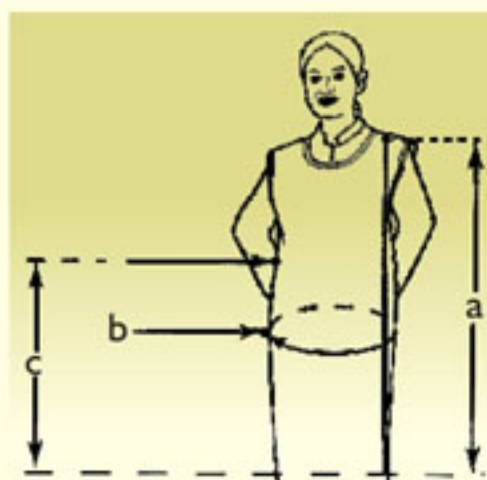

### OVARIAN SHIELD

Protection of female genital area.

For aprons, you will be required to specify measurement. Please refer to the sketch below.

- a: Length from mid-shoulder vertically to length required
- b: Widest girth
- c: For skirt, measure from waist to length required

Custom designs, colours and lead equivalence are available with special orders.
